

# BIOGRAPHY

## **Christopher Pino,**

**Chief Information Officer, Space Operation Mission Directorate,  
NASA HQ**

**Office of Space Operations; NMIS Project Manager, Program CIO;  
Institutional and Assets Management**

Since joining NASA in June, 2000 Chris Pino has served as the IT Lead and Senior Requirements Analyst for both Public Affairs and for the Office of Space Operations. He transitioned into the Civil Service in June, 2003 into his current position.

He has managed the development and operation of the organizations MIS system from its inception in June of 2002 to its current deployment across all the OSO centers and programs. He has also been a champion of innovative IT policy and management process reform across the Directorate. Is main focus is on the strategic use of IT to help achieve strategic mission and mission support objectives.

Prior to joining NASA, he spent his career developing leading edge systems in the academic, private, and government sectors. He has held academic and technical posts at Yale, Columbia, New York University, and the Graduate Faculty of the New School for Social Research. His work in the government sector included a lengthy consultancy with the Library of Congress and the families of Leonard Bernstein, George and Ira Gershwin, and Alan Lomax. He designed and managed the development of commercial products for Sharp, Time Warner, Olympia and York, Cavri, Rupp Corporation, WNET, and GTE Interactive.

Mr. Pino received a B.S. degree in Psychology from Michigan State with a minor in Computer Science and Statistics and has completed a MS in General Psychology from the Graduate Faculty of the New School for Social Research and both an MA and MPh in Clinical and Experimental Psychology from Yale.
